

ITWorkShop :: III , Monsoon 2008

Course Instructor : Dr. Vikram Pudi

Assignment :: 2

Deadline : Fourth week of Aug, 2008

Ques: Using Html and CGI Scripting make a Web Editor. Your program should do the following :

1. It should display the file SomeExample.txt
2. The User can modify the contents of the File.
3. The User should be able to save the file only when the user provides the correct password.

Note ::

1. Make sure that you don't copy the Assignment. If found so, strict action will be taken.

2. The Important thing is to attempt the problem as much as possible.
